

Category Application:

Food Bars

Product Highlights

- Pure, natural, clean-label
- No artificial colors, flavors, additives or preservatives
- Low water activity (0.40-0.55 aW)
- Safe food does not support microbial growth ($\text{pH} < 4.2$; $\text{aW} < .82$)
- Bake-stable
- Unlimited flavor innovations
- Flexible formulation design
- Gluten-free; Vegan; Kosher

BeyondHealthy!

An innovative way to add unique taste sensations and nutrients to your bar projects

Beyond Ingredients fruit and vegetable bits fit perfectly with consumer enthusiasm for 'real foods' with simpler, recognizable and wholesome ingredients. Our proprietary technology transforms fresh or frozen fruit juices and purees into high fruit content, low-moisture ingredient inclusions. We can fine-tune the water-activity (aW) level to your dry application, and all versions do not support microbial growth. Our ingredients undergo minimal processing or heat exposure retaining their natural nutritional attributes, flavor, and color without the addition of artificial additives, sugars, preservatives or chemical coatings.

Flavor Excitement

We can also help you add excitement to your new bar projects through innovative flavors and tastes. From traditional to exotic single notes to almost any fusion blend is possible.

Functional Fortification

And we can plus up the nutritional profile of your next innovation through fortification with vitamins, minerals, prebiotics, probiotics or fiber to support marketing claims. Or send us your own proprietary blend and we will develop fruit or veggie bits that become your special signature.

Building Better Products...Bit by Bit

We source the very best juice concentrates and purees from around the globe that are harvested at their peak with the perfect Brix, PH and flavor. Our deep competence in food science and gentle processing approach honors the beautiful ingredients provided by Mother Nature. We like to say its **Nature's Best Made Better™**

Quality and Food Safety

We enforce extensive quality programs and procedures GMP (Good Manufacturing Practice), HACCP (Hazard Analysis and Critical Control Points), OU Kosher and Allergen Control among many others. We are regularly audited by third parties as well as frequently conduct our own internal reviews and inspections. Our staff and lab technicians are well-prepared to stay on top of the growing number of regulatory requirements of customers and governments to insure only top quality and safe products are delivered to our customers.

Custom Product Development

We do not have "stock" products; each customer receives a custom solution to call their own. If you have an idea or a specific need in mind, our R&D resources are ready to lend a hand. We can provide product expertise, nutrition insight, and production knowledge in your pursuit of bringing an innovative product to market.

Made in the USA!

We are proud to call Missouri our home particularly as it supports easy central distribution to all corners of the USA...and Beyond! For our customers that means fresher product without extra import taxes, tariffs, custom holds, or FDA rejections.
